## Tips for using R.A.C.E.

## **R**ecognize Distress

- Look for signs of distress
  - $\checkmark$  Note changes in personality, emotions, or behavior
  - ✓ Note withdrawal from co-workers, friends and family
  - $\checkmark$  Note changes in eating and sleeping patterns

## **A**sk the Veteran

- To determine if the Veteran is suicidal, it is helpful to
  - ✓ Interact in a manner that communicates concern
  - ✓ Calmly inquire about distress you observe
  - ✓ Know how to manage your own discomfort in order to directly address the issue
- The most difficult R.A.C.E. step is asking
  - ✓ You look upset. "Are you thinking about killing yourself?"
  - ✓ "Do you wish you were dead?"
- When to ask the question
  - ✓ Ask the question anytime you think the Veteran may be a danger to him/herself

## **C**are for the Veteran

- Show the Veteran that you care about what they are saying and that you are not passing judgment on what they think or feel
  - ✓ Actively listen to their story. Don't judge
  - ✓ Nod your head and encourage them to tell you more – let the person know they are not alone
  - ✓ Calmly control the situation
  - ✓ Do not use force; keep everyone safe
- Accept that their situation is serious and deserving of attention while you also offer the person **Hope**

#### **E**scort the Veteran

- Do everything you can to encourage and expedite the Veteran getting help
- Explain that there are trained professionals available to help. Suggest treatment might help
- If the veteran tells you that they have had treatment before and it has not worked, try asking: "What if this is the time it does work?"
- Call the Suicide Prevention Lifeline for additional information, guidance or help: 800-273-8255 Press 1

## **Safety Guidelines**

# Call 911 or take the Veteran to the emergency room if

You are not in face-to-face contact but are speaking over the phone or computer with a Veteran who expresses intent to harm self or others.

A Veteran is displaying threatening behavior with a weapon or object that can be used as a weapon.

A Veteran tells you that they have overdosed on pills or other drugs or there are signs of physical injury.

# R.A.C.E.

The purpose of R.A.C.E. is to help Veterans, their family members and friends learn the necessary steps they can take to help someone in need.

The acronym **R.A.C.E.** (**R**ecognize, **A**sk, **C**are, **E**scort) summarizes the steps needed to take an active and valuable role in suicide prevention and necessary steps to get help.

## Ways of Preventing Suicide

#### **Prevention:**

Reducing things that contribute to suicide

#### Intervention:

Increasing safety of person with thoughts of suicide

#### Postvention:

Help for people who injure themselves and those affected

## Warning Signs of Acute Suicide Risk

#### Warning Signs are early indicators of heightened risk

These signs require immediate attention

- Threatening to hurt or kill themselves, or talking of wanting to hurt or kill themselves;
- Looking for ways to kill themselves by seeking access to firearms, available pills, or other means;
- Talking or writing about death, dying, or suicide, when these actions are out of the ordinary
- Expressing wish to go to sleep and not wake up

## What Veterans and Their Family Members and Friends Should Know about Suicide

- Asking a Veteran about suicide does not create suicidal thoughts any more than asking about chest pains causes a heart attach
  - The act of asking may give the Veteran permission to talk about thoughts or feelings
- Many people who die by suicide have communicated some intent, wish, or desire to kill themselves
  - Someone who talks about suicide gives you an opportunity to intervene before suicidal behaviors occur
- Many suicidal ideas are associated with the presence of underlying treatable conditions
  - Providing treatment for an underlying condition can save a life
  - ✓ Helping the person survive the immediate crisis so that they can seek such treatment is vital
- Suicidal thinking can overwhelm even the most rational person
  - ✓ Protective factors may not provide a sufficient buffer during periods of crisis
- Anyone experiencing serious suicidal thoughts should be Escorted to the nearest Mental Health Provider or Emergency Department who can evaluate their conditions and provide treatment as appropriate. Don't Leave The Person Alone. Stay With Them Until They Are In The Care of Professional Help
- If harm to self and/or others is occurring or about to occur, activate an emergency response – Call 911 Immediately

## Additional Warning Signs

## The presence of these signs requires contact with a professional

- Inability to sleep or sleeping all the time
- Withdrawing from friends, family and/or society
- Expressions of helplessness, hopelessness or worthlessness
- Increasing alcohol or drug use
- Acting recklessly or engaging in risky activities
- Rage, anger, seeking revenge
- Avoiding things or reliving past experiences
- Giving away personal possessions
- Feeling trapped like there is no way out
- No reason for living No sense of purpose in life
- Dramatic changes in mood
- Anxiety, agitation

## **Protective Factors**

Factors that can protect one from suicidal behavior

#### Protective Factors include:

- Strong family relationships, friends, social support, buddies
- Effective coping and problem-solving skills
- Positive, healthy lifestyle diet, exercise, rest
- Stress reduction activities
- Ongoing health and mental health care relationships Early interventions
- Healthy spiritual/religious affiliation
- Reasons for living
- Opportunities to make significant contributions
- Sense of belonging to a group: Cohesion Camaraderie – Support
- Cultural and religious beliefs that discourage suicide and support living
